"Passionate about building modern, high-performance web applications and creating innovative digital experiences."

Summary

Full-stack developer with 4 years of experience specializing in building scalable web applications using React, Next.js, and TypeScript on the frontend, and Django with Django REST Framework on the backend. Experienced in designing complete systems from architecture to deployment, including RESTful APIs, authentication, and real-time features. Strong focus on performance, clean code, and intuitive UI/UX. Comfortable working across the entire development lifecycle, including database design, API development, and deployment using Docker.

Work Experience

Lift & Cable Installation Company Management Platform

Freelance

FULL-STACK DEVELOPER

October 2025 - December 2025

- Architected and delivered a full enterprise management system using Django REST Framework (backend) and React, TypeScript, Tailwind CSS (frontend).
- Implemented complete project lifecycle management including client registration, project creation, verification, employer assignment, and maintenance scheduling.
- Developed advanced inventory management with stock tracking, reorder alerts, and profit margin calculations.
- Built invoice management system with multi-line invoicing, product integration, and financial tracking.
- Created interactive calendar for project scheduling and maintenance planning with filtering capabilities.
- Secured the platform using JWT authentication and role-based access control for admin and assistant users.
- Implemented statistics dashboard with visual insights on verified projects and profit analysis.

Academic Project Management Platform – ProjectTrack

ESI-SBA

WEB APPLICATION (FRONTEND/FULL-STACK)

March 2025 - May 2025

- Developed a comprehensive academic project management platform for Higher National School of Computer Science (ESI).
- Unified students, professors, companies, and administrators under one platform, streamlining collaboration for 1000+ users.
- Implemented project submission, supervision, evaluation tracking, and role-based dashboards, reducing manual tracking by 60%.
- Built real-time notification system using WebSockets, cutting communication delays by more than half.
- Organized projects by specialization (ISI, SIW, AI), making project search and filtering 3x faster.

The Official State Library Website Of Tissemsilt

Ova Digital

LIBRARY MANAGEMENT SYSTEM (FRONTEND/FULL-STACK)

December 2024 - May 2025

- Developed a multilingual, responsive library website with 20+ feature-rich pages.
- Implemented room reservation system, book browsing, and article reading, improving accessibility for 5,000+ monthly visitors.
- Built dynamic testimonial sections and book rating systems with comments, increasing user interaction by 35%.
- Created an administrative dashboard for content management, reducing content update time by 50%.

FoodExplorer Website

Freelance

FOOD REVIEW PLATFORM (FRONTEND/FULL-STACK)

August 2024

- Built a fully responsive food exploration website for a content creator reviewing restaurants.
- Implemented a dynamic dashboard for managing posts, feedback, and media content, making publishing easier and faster.
- Integrated Firebase for authentication, real-time database, and image storage to ensure smooth and reliable performance.
- Focused on clean UI and optimized performance, achieving high Lighthouse scores for speed and accessibility.

Creative Portfolio Platform

Freelance

PHOTOGRAPHER PORTFOLIO WEBSITE (FRONTEND/FULL-STACK)

July 2024

- Developed a modern, responsive portfolio website for a professional photographer to showcase images and videos.
- Built a custom admin dashboard for uploading, organizing, and deleting media content, simplifying content management.
- Used Firebase for authentication, cloud storage, and real-time database, enabling fast and reliable content updates.
- Optimized media display and responsiveness for smooth navigation across devices.

LOTOK

ESI-SBA

CAR RENTAL PLATFORM (MOBILE APPLICATION/ ANDROID)

December 2023

- Developed full-featured car rental platform for the Algerian market.
- Connected agencies, individual car owners, and renters for secure transactions.
- Implemented verified user profiles and integrated payment systems, improving trust and reducing fraudulent attempts.
- Built centralized car listing interface with advanced search and VIN decoding, cutting car discovery time by 45%.

Education

Higher National School of Computer Science (ESI)

Sidi Belabes, Algeria

MASTER'S IN COMPUTER SCIENCE

- Focus on Software Engineering and system design.
- Data structures, algorithms, OOP with Java.
- Networking fundamentals and protocols.
- Active participation in multidisciplinary projects.

19 March 1962 High School

Mila, Algeria

BACCALAUREATE

2022

- Graduated **first in the city** in the Science stream.

Technical Skills

- **Backend:** Django, Django REST Framework (DRF).
- **APIs & Real-Time:** RESTful APIs, JWT Authentication, WebSockets, GraphQL (basic).
- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3.
- **Styling:** Tailwind CSS, shadcn/ui, Responsive Design.
- **State Management:** React Context API, Redux Toolkit.
- **Forms & Validation:** React Hook Form, Zod, Yup.
- **Routing:** React Router, Next.js Routing.
- **Data Fetching:** Axios, Fetch API, React Query (TanStack Query).
- **Database:** PostgreSQL, MySQL, Firebase, Supabase, SQL, NoSQL.
- **DevOps:** Docker.
- **Deployment:** Vercel, Netlify.
- **Dev Tools:** Git, GitHub.
- **Build Tools:** Vite, Webpack.
- **Mobile:** Kotlin, Java, Jetpack Compose, Android Studio.
- **Concepts:** OOP, Data Structures & Algorithms, System Design, Scalable Architectures, Networking.

Languages

- **English** (Advanced)
- **Arabic** (Native)
- **French** (Intermediate)
